

Kansai University of International Studies

◆ Courses / Majors

Amagasaki Campus

1. School of International Communication

① Department of English Communication

Fostering individuals who can engage in practical communication with diverse people and “bridge” Japan and the world in business and cultural exchange.

By guiding students to first use the tool of English skills and learn the basics of international business, and then understand diverse community cultures particularly in the Asia-Pacific, the School of International Communication fosters individuals capable of management in real-world situations

❖ Major in Business Communication

Hone your approach to business and the ability to hold dialogue and discussion with people of different cultures.

Students will acquire both English skills and the basics of international business as vital tools of international communication, and gain deeper understanding of the community culture in study abroad destinations. This major fosters individuals who can serve as a bridge between Japan and the world in business settings.

❖ Major in International Community Culture

Gain deeper understanding of the culture and society of Japan and the Asia-Pacific, and develop the ability to “bridge” Japan and the world.

Through experiences such as study abroad in the Asia-Pacific region, students will gain understanding of different community cultures and senses of value, and develop practical English and communication skills. This major fosters individuals who can play an active role in the fields of tourism, cultural exchange, and international contribution and cooperation.

2. School of Education

① Department of Child Education and Social Welfare

Seeking to produce professionals in education and welfare who can satisfy the needs of our times.

Under the motto of producing professionals in education and welfare who can satisfy the needs of our times, the School of Education cultivates in students the keen sensitivity to respond to society's.

❖ Major in Social Welfare

Developing certified social workers and childcare providers to play a role in welfare.

This major develops certified social workers and childcare providers with the capabilities and comprehensive management skills required to play a role in welfare. It also nurtures the ability to identify community needs and challenges, and support children and their families.

❖ **Major in Child Education**

Aiming to foster practical skills help students obtain multiple certificates.

This major fosters teachers and childcare providers with practical skills and multiple certificates, equipped to be the competitive professionals required in tomorrow's education.

3. School of Management

① **Department of Business Management**

Fostering individuals capable of confident management amid the ebb and flow of global society and local communities.

Master the basics of economics and management, and acquire real-world management skills for a safe, secure global society. Through multilayered, comprehensive hands-on learning programs befitting our era of globalization, the School of Management seeks to foster individuals with practical skills in community innovation and other forms of management.

❖ **Major in International Tourism**

Develop both theoretical and practical skills through off-campus survey activities.

Students will acquire both theoretical and practical skills through learning based on field surveys. This major fosters capabilities such as acting with an international perspective, enriching society through tourism, and maximizing community traditions and unique cultural assets.

Miki Campus

1. School of Management

① **Department of Management**

Fostering individuals capable of confident management amid the ebb and flow of global society and local communities.

Master the basics of economics and management, and acquire real-world management skills for a safe, secure global society. Through multilayered, comprehensive hands-on learning programs befitting our era of globalization, the School of Management seeks to foster individuals with practical skills in community innovation and other forms of management.

❖ **Major in Community Management**

Acquire management skills that lead to community innovation.

Students will learn about management that leads to community innovation. This major aims to foster individuals who can contribute to the maintenance and development of diverse communities, whether urban or rural. It is ideal for students, for example, who seek a job based in their hometown.

❖ **Major in Disaster Risk Reduction and Crisis Management**

Acquire various knowledge on disaster risk reduction to realize a safe, secure society living with risks.

Students will foster the practical skills of leaders capable of dealing with adversities such as disaster and crime to create a safe, secure society. This major is designed for students, for example, who seek to be a manager in company crisis response or food distribution control, a firefighter, or a police officer.

2. School of Human Sciences

① Department of Human Psychology

Envisioning a society that ensures safety and security, and empowers us to demonstrate our individuality.

Our times are marked by a multitude of issues in the areas of personal relationship, mental and physical health, disaster, accident, and crime. The School of Human Sciences cultivates individuals who can help shape society so that we may maintain safety and security in leading our lives and demonstrating our individuality.

❖ Major in Psychological Counseling

Acquire specialized knowledge toward becoming certified psychologists and clinical psychologists.

Students in this major will acquire specialized knowledge and skills in psychological counseling useful not only for working as specialists in clinical psychology in fields such as education, health care, welfare, industry, justice, and crime but also for interacting with people in daily life.

❖ Major in Criminal Psychology

Acquire diversified analytical skills for understanding the mechanism of crime and delinquency.

Students will acquire knowledge for elucidating the psychology and mechanism of crime and delinquency, and preventing occurrence and recurrence. This major provides specialized knowledge that links directly to careers in crime and delinquency, such as police officer and juvenile detention center teacher.

❖ Major in Disaster Psychology

Acquire the ability to respond to various disaster types and situations.

Students in this major will acquire diversified skills for psychologically understanding human behavior and mind in various types of disaster, from natural to man-made, and for putting those skills into practice to restore safety and security.

❖ Major in Industrial Psychology

Acquire specialized knowledge and skills in psychology useful in business scenes.

Students in this major will acquire specialized knowledge and skills in psychology and cultivate the ability to put those into practice in various business scenes such as planning, product development, advertising, design, customer service, and organizational operation.
