

Kansai University of International Studies

◆ Courses / Majors

Kobe Yamate Campus

1. School of Sociology

Department of Sociology

Fostering graduates with a data-driven understanding of social problems and the ability to solve them in order to create a new normal for future society.

❖ **Major in Ethics and of Multicultural Society**

We aim to foster graduates who have a wide range of knowledge about coexistence not only in Japan but also in other countries, and devise concrete solutions through social research.

❖ **Major in Data Science**

With basic knowledge and skills in data science and data engineering, we aim to foster graduates who can contribute to the creation of innovation in various areas of modern society.

❖ **Major in Culture and Media**

Focusing on the future of the information society, we cultivate students who will be active in the field of information dissemination utilizing social media and local media.

2. School of Global Communication

Department of Global Communication

We cultivate students who have the flexibility and values to grasp things from an international perspective, who can use English as a communication tool and have the practical knowledge and skills required to play an active part in a globalized society and work in careers related to society, culture, language, and tourism among others.

❖ **Major in Global Business**

We cultivate students who have the flexibility and values to grasp things from an international perspective, who can use English as a communication tool and have the practical knowledge and skills required to play an active part in a globalized society and work in careers related to society, culture, language, and tourism among others.

❖ **Major in Multicultural Coexistence**

In addition to English language skills, which form the basis of communication, students learn the commonalities and uniqueness of regions, societies, and cultures around the world. We cultivate students to be active in all kinds of companies and organizations facing globalization, including public officials and NGO employees.

Department of Tourism

Fostering graduates who develop global hospitality skills that utilize practical English and communication skills. Students gain specialized knowledge and skills through a practical curriculum that provides opportunities to collaborate with companies and local governments.

❖ Major in Tourism

We will develop graduates for the tourism business that will innovate Japanese tourism in the future including domestic travel in the Corona era, inbound tourism, community-based tourism, and new tourism businesses utilizing ICT.

❖ Major in Hotel & Bridal Services

We aim to develop graduates who acquire a practical English ability and high hospitality skills, provide a comfortable and secure venues, and can produce lovely and memorable experiences.

❖ Major in Airline Services

In addition to the expertise in the aviation industry and excellent language skills, we will develop graduates for global airlines who have acquired the highest level of internationally recognized hospitality skills.

3. School of Psychology

Department of Psychology

Fostering graduates who contribute to the creation of a society where each and every one of us can feel safe and "utilize psychology" to address various problems in a modern society such as interpersonal relations, physical and mental health, disasters, accidents, crime, etc. In the school of Psychology, students will deepen their learning through the four majors with a common theme of "mental health" and "safety and security of society".

❖ Major in Clinical Psychology

Students will learn the specialized knowledge and skills of psychological counseling through hands-on learning. Through hands-on learning of counseling and psychological tests, students will learn how to relate to and support others. In addition to aiming to be a certified psychologist and clinical psychologist, students will learn the knowledge and skills that can be utilized for communication in social life.

❖ Major in Criminal Psychology

There are various factors behind the crime and delinquency and students will learn the psychology of criminals and juvenile delinquents, new perspectives on criminal incidents, rehabilitation support, and crime prevention in order for graduates to make contributions to creating a crime-free society.

❖ Major in Disaster Psychology

Students will learn about the thoughts and behaviors and study support methods in order to assist people in various disasters and can contribute to the prevention and mitigation of disasters.

❖ **Major in Industrial and Consumer Psychology**

Students will acquire specialized knowledge and skills in psychology that can be used in various business situations such as planning, product development, advertising and design, customer service, and organizational management.
