03 - 89216988

Institut Islam Hadhari UKM

This comprehensive course offers students and researchers worldwide an in-depth exploration of Islam in Malaysia, covering its rich history, legal framework, economic landscape, societal influences, and religious practices. Additionally, the program delves into the dynamic intersection of science, technology, and Islamic scholarship, with a special focus on Islamic astronomy (falak) in Malaysia. As a progressive Muslim nation that upholds a balanced and moderate approach to Islamic principles, Malaysia provides a compelling case study for understanding the evolving role of Islam in governance, education, and scientific advancement.
